EVE EVAPORATED MILK 250ML TETRA COMPROMISED

A.S. Bryden & Sons, the proprietors of the Eve brand of products in Trinidad, wish to inform the public about compromised batches of Eve Evaporated Milk 250ml currently in circulation. This product was exposed to prolonged heat due to delays in shipping and clearing, and as a result, was earmarked for disposal. Products with the following batch codes

N7 3233154AG, N7 3234154AG, N7 3164154BG

were stolen during transit to the destruction site, and these items do not meet the stringent quality standards upheld by Eve.

There is a concern that unauthorized parties may attempt to sell the pilfered product through unauthorized channels, possibly infiltrating traditional retail outlets. We strongly advise our valued customers and consumers against purchasing these particular batches from any sources outside of our officially designated distribution channels.

Rest assured, the remainder of the Eve product range upholds the highest standards of quality and remains safe for consumption.
